In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake (F) minus all Outcomes (R+V). \longrightarrow 13 67 80

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

COMMENTS:

I have reviewed all of the records and find no errors. The difference is likely duplicate animals that were entered in with different names. (Entered twice with two different names).

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund $^{\odot}$ Categorizations/Definitions of Shelter Animals."
